- 13:55-14:50 **Panel discussion**  
In addition to the speaker of each regional programme, panelists will include:
- *Mr. Mozaharul Alam* (Bangladesh Center for Advanced Studies, Bangladesh)
  - *Mr. Taka Hiraishi* (Institute for Global Environmental Strategies, Japan)
- 14:50-15:00 **Wrap-up** by *Prof. Ryokichi Hirono* (Seikei University, Japan)

### **Background:**

In recent years, Asia-Pacific countries are more and more engaging in activities addressing the climate change issues, whilst they have been performing rapid economic growth. This demonstrates opportunities to realize co-benefits between tackling the climate change and driving national and regional development. This side event will present five distinguishing cases of on-going regional activities in the fields of (1) policy development, (2) greenhouse gas inventories, (3) capacity building of scientific research, (4) co-benefits approach, (5) the future vision in 2050. Selected panelists will then discuss to explore a new model of sustainable development in the Asia Pacific region.

### **Key objectives:**

- To introduce distinguishing cases of regional activities focusing on different aspects of climate change issues
- To identify the best-practices and challenges of regional activities in the Asia-Pacific
- To explore a new model of sustainable development in the Asian-Pacific region.
